| April 01, 2026 | - camera-ready paper submission and registration |
| June 01-05, 2026 | - conference dates |

PAPER SUBMISSION

All papers must be submitted through the online system:
<http://ia.spcras.ru/index.php/adop2026>.

Submitted papers must not be under consideration by another conference, previously published or accepted for publication elsewhere. Authors must submit for review an English-language paper of 10–12 pages, formatted in the Springer publisher style.

Accepted papers must be personally presented at the conference by the authors. No more than two papers are allowed from one author.

The aim of the conference is to consolidate interdisciplinary knowledge in the fields of agriculture, biology, robotics, information technology and economics to solve urgent problems of digitalization of organic livestock and crop production based on the achievements of fundamental science and the best practices of agricultural companies.

TOPICS

- Digital technologies and automation in crop production
- Digital technologies and automation in animal husbandry
- Digital technologies and automation in aquaculture
- Digital technologies and sustainable development of agriculture
- Digital technologies, production and markets of organic products
- Organic agriculture: organizational, economic and legal aspects
- Rational nature management and ecology in agricultural production
- Robotics in agriculture

SPECIAL SECTIONS

- Biologization in animal husbandry
- Biologization in crop production
- Digital economy of agro-industrial complex
- History of science and technology in agro-industrial complex
- Innovations in processing of agricultural products

CONFERENCE PROCEEDINGS

The accepted papers will be published in the proceedings of the ADOP conference in English in the Springer SIST series of books indexed in Scopus and Springerlink.

LANGUAGE

The official languages of the conference are English and Russian.
